- Darren
- Cam

Meeting content

- Introduction of all team members.
- Working with flood extents.
- Who uses the information?
 - What service?
EICU - Emergency Information Communication Unit is contacted to capture flood extents via imagery.
Zero cloud if possible,
 - What customers?
Emergency services.
DPI
SES
Infrastructure

Planning
Utilities
GeoScience Australia

- Worked
- Data turn around time
48 hours, which is why there are seam lines on the imagery.
- Near Infrared imagery - better at displaying flood extent
- What is the desired result
Create flood extent boundaries on DCS imagery. Vector file format.
- Extras
Creates a historic record. Can be used to see where the flood comes to based on past experience and who may need to be evacuated
