

Meeting Minutes

Date 26-3-21 Time 8.00 - 8.36pm

Notes:

- David will record the meeting to his computer
- DCS are paying money for AWS exam, to pass exam training should be sufficient
- David sent email with the High Level Business Requirements. Fill this out as a draft and David will count towards LCOM and assist with final copy.
- We are working Intellify <https://intellify.com.au> - new company, DCS are putting in \$50,000 for the project.
 - 2-3 years history
 - Contracted with DCS
- AWS Qualification will help with employment at government agencies
- Don't panic, David will guide you, you will be successful. "I am here to protect you!"
- We didn't promise to turn out commercial project - ensure this is noted in scope.

What do they want us to do?

- Plan Identification Initiative
 - DP numbers to be extracted from graphics
 - Use training and Java to find existing ways of doing this.
 - Use AWS tools
- Feature Extraction
 - Identify the area
 - Feature Extraction
 - Training
 - Identification / Classification
 - Use existing algorithms to get what we need
 - Find distance from scale of picture / pixel
 - Multi spectral imagery will help with fire / flood?
- For both projects
 - Check out JSON
 - NSW Cadastral Database
 - Content based image retrieval
- DCS want to talk to us at least once a month, maybe more
