Meeting Minutes

Date 04-07   Time 8:00pm - 8:40pm

Attendees

Adam Blewitt
Cameron Nyberg
Darren Sheehan
Patrick Funnell

Apologies

Andrew Smith

Agenda

❖ Meeting content

Discussion around setting up AWS accounts, following DCS certification for all members of the group.

Consideration of project depth and different technologies/ideologies that may be useful/implemented (serverless instances, lambda, etc.)

DCS declared for Team 3, that they would provide credit for use, in building their AWS cloud solution - we can likely safely bet we will receive the same/similar.

❖ Issues and Challenges

We still have no way of understanding the problem, to build a solution, as detail is yet to be provided by the relevant parties.

We're uncertain of the complexity of the project model, and thus the need/requirement for a custom model.

❖ Review Previous Iteration Work Items

Still awaiting the completion of the Project Plan, pending further information from David/DCS

❖ New Iteration Work Items

Nill

❖ To Be Actioned

AWS Certified Cloud Practitioner Exam - Everyone
Project Plan - Cameron
